

# Are your applications **READY?**

## ZAPTZ provide Windows 7 Application Remediation in The Cloud!

Zaptz enables Windows 7 analysis and remediation for whole software portfolios or individual applications via its online Ezytracker portal [www.zaptz.com]. Zaptz automates the conversion, packaging or virtualisation of multiple applications for clients and partners right across the globe. Zaptz have been providing dedicated packaging and virtualisation services for more than five years and are uniquely positioned to provide Windows 7 migration services better and faster than any other service provider.

- Windows 7 application migration cost analysis
- Windows 7 & 64bit application readiness assessment
- Windows 7 application remediation
- Windows 7 application packaging and virtualisation
- Virtualisation Readiness Assessment (APP-V, ThinApp, Xenapp, SWV)
- Virtualisation Comparison Assessment (APP-V, ThinApp, Xenapp, SWV)
- IE8 Readiness and Impact Assessment
- Office 2010 Readiness and Impact Assessment

Automating software installs  
across the earth, from your desk
